seOverflow Named One of Denver's Fastest Growing Private Companies

DENVER, CO – July 15, 2010: seOverflow (<http://www.seoverflow.com>), an industry thought leader in search engine optimization and national provider of search engine optimization services has been named one of Denver's fastest growing private companies by the Denver Business Journal.

“We are so excited to be named one of the Denver area's fastest growing private companies and recognize that our growth is a result of our diligence to stay on top of industry changes on a daily basis, our committed staff, and our referral partners who see us as thought leaders and turn to us for SEO expertise.” says Mike Belasco, president and founder of seOverflow.

seOverflow's growth is a result of their difference in the SEO marketplace. seOverflow only does SEO. They do not design websites, allowing them to concentrate on educating their staff on the daily changes that can happen in the SEO industry. They have built long-lasting relationships with not only their clients, but with referral partners. Their ability to build great business relationships is attributed to their integrity and commitment to their clients and referral partners.

Kandra Churchwell, President of Phases Design Studio (<http://designfiles.net>), a Denver website and graphic design firm noted, “Our firm has chosen to work with seOverflow for probably some of the same reasons why they are one of Denver's fastest growing companies. Mike Belasco and his team provide quality work and customer service that is exceptional. Mike works with our clients to find out what their end goals are and listens to them. He has integrity and sound business ethics. seOverflow's services have had a great return on investment for our clients.”

Additionally, seOverflow's President, Mike Belasco has made an effort to educate businesses on SEO by volunteering his and his staff's time at speaking engagements and workshops locally, nationally and

internationally. seOverflow is also recognized by his peers and has received numerous awards in the industry.

seOverflow had 175% growth from 2007 to 2009 based on the Denver Business Journal's calculations. Each year the Denver Business Journal recognizes the ten fastest growing private companies in five flights, based on total revenue. Companies are then ranked within those categories based on the percentage of growth for the previous three fiscal years (2007, 2008 and 2009).

###
